

Resumo

Developer with 4 years of experience in developing systems for various industrial sectors. I have solid knowledge in technologies such as NextJs, React, Typescript, PHP, Laravel, and MySQL, among others, as well as expertise in Data Structures, Design Patterns, Clean Code, Clean Architecture, and System Design. I am currently studying Systems Analysis and Development.

Professional Experience

Full-Stack & Mobile Developer

Clinic Where | 11/2023 - 05/2024

Clinic Where is a carefully developed software designed to enhance the patient care experience and improve the efficiency of healthcare professionals' practice management.

- Developed new features to improve the user experience in the software.
- Efficiently identified and resolved code issues and bugs to ensure the system's continuous stability and reliability.
- Analyzed and improved system performance, aiming to enhance efficiency, speed, and responsiveness, providing a faster experience for users.
- Created integration between different systems, ensuring smooth communication and efficient data exchange.
- Developed detailed documentation covering the technical aspects of the project, facilitating maintenance and the development of future features.

Front-End Developer

ManyContent | 07/2023 - 09/2023

ManyContent is the first AI-powered content creation platform in Brazil.

- Contributed to the development of a system using Next.js, React, and Node with a focus on microservices architecture.

Full-Stack Developer

InCentea | 10/2019 - 03/2023

InCentea is a group of companies providing professional services in the areas of Information and Communication Technology, Marketing and Innovation, Business Consulting, and Product Engineering.

- Collaborated with the production team, contributing to the development of new features and bug fixes in the application.
- Improved system performance, implementing enhancements that resulted in a faster and more efficient user experience.
- Prioritized data security and user experience, incorporating MD5 encryption to ensure adequate protection of sensitive information.
